groenterras
live your terrace

Groenterras is a young Ghent (Belgium) based company, which originated from the passion for outdoor spaces in the city on the one hand and the astonishing observation that hardly anyone does anything with their outdoor space on the other. A terrace, balcony or patio is often used only for garbage bags and empty beer bins...

We create fully-fledged outdoor rooms tailored to the available space. We try to integrate greenery in a creative way and think in 3D. This implies that we can accentuate all the positive qualities of a terrace, but also solve all problems: lack of privacy, 'erasing' lesser views, sun protection, windbreak,...

By playing with integrated lighting and adapted furniture and color, we can visually enlarge the living space. A beautiful terrace or balcony obviously also improves the atmosphere in the room.

By customizing vertical gardens and the use of mature climbing plants, we make the city greener, we combat overheating and we extract CO₂ from the air. We are therefore convinced that this is a win/win for the terrace owner, for the neighbors and for the aesthetics and quality of life in the city.
